

# Technotutorz

Technotutorz are back with another exciting workshop learning about electronics and how to use it in robotics as well as building up, programming and playing with one of our many robots.

## This time there are two options:

### Option 1:

Build up a standard robot kit ( Robobox or Robostamp) and complete various challenges. Learn about motors, chassis, microcontrollers and sensors.

### Option 2:

Build up your own robot, using a Picaxe, from basic parts to take home. For this you will learn how to solder electronic parts and program your robot.

Added cost: \$65.90

**Dates:** 23 and 24 January 2012 (9 to 4pm).

**Cost:** \$80 per day or \$150 for two days. Special rates apply for extended hours. Bookings are essential.
